Abstract (en)

[origin: WO2008018096A1] A new intervertebral spacer (S) for interosseous positioning suitable for insertion between two vertebrae (V), comprising an extendible membrane (M) forming an internal space suitable for being filled wholly or partly with cementing substances, and wherein said membrane (M) can increase/reduce its extension, adapting in form and/or dimensions to the intervertebral space. The new spacer (S) comprises one or more protruding parts or teeth (D) positioned on one or both surfaces (Sv) facing said vertebrae (V).
