Abstract (en)

[origin: WO2008007022A2] The invention relates to a set of a self-supporting mosaic (10) intended to serve as bumper skin for an automotive vehicle and at least one body panel (30, 32). The self-supporting is equipped with attachments to the vehicle's blank body. The mosaic<I/>comprises at least one part (16) intended to remain visible once the self-supporting mosaic<I/>is mounted on the vehicle and is part of the bumper skin, at least one receiving area (22, 24) for the body panel (30, 32) and means (34, 36, 46) for attaching the body panel (30, 32) to this receiving area. The body panel constitutes another part of the bumper skin. The body panel itself is produced by cutting or thermoforming. The invention also relates to a set of at least two self-supporting mosaics as well as a body panel (30, 32) intended for the set.
