Abstract (en)

[origin: WO2008017410A1] By way of an apparatus and a method for sterilizing containers (11) with a guiding device (2, 12) for introducing a gaseous and/or vaporous sterilization medium into the interior of a container (11) through a container opening, a solution is to be provided, by way of which containers (11) are to be sterilized in as simple a way as possible and nevertheless to a standard which is sufficient for aseptic treatment and filling. This is achieved by the fact that a guide device (3, 13) is provided for directing the sterilization medium which emerges from the container onto the outer wall of the container (11).
