Abstract (en)

[origin: WO2008002394A1] The present invention provides a reclosable package assembly (10) for a plurality of individual center-filled gum pieces (12). The package includes a package housing (14) having a front wall (18) and a back wall spaced from the front wall. A closable flap (22) is provided for closing a dispensing opening (24). A divider member (30) is insertably supported within the package. The divider member defines discrete channels for individually supporting and separating the gum pieces.
