Abstract (en)

[origin: WO2008105915A2] In one aspect of the invention, a high impact resistant tool having a superhard bonded to a cemented metal carbide substrate at a non-planar interface. The superhard material has a substantially pointed geometry with a sharp apex having .050 to .125 inch radius. The superhard material also has a .100 to .500 inch thickness from the apex to the non-planar interface.
