Abstract (en)

[origin: DE102006042028B3] The device has an outer connection contact (6) formed as a metallic form part comprising an integral extension side piece (7), where an u-shaped end (9) of the side piece points to a solder joint. A connection point of an arrester element is formed as a planar part (10), which is secured with a section of the u-shaped end by a solder. The metallic form part and a finger stand under self-spring stress, where the finger is supported at a guide and is engaged into the space closed by the u-shaped end of the form part.
