Abstract (en)
[origin: EP2050353A1] The compact (1) has an element (6) formed of storage and closing surfaces (6A, 6B). Another element (7) is formed of internal and external surfaces (7A, 7B). A connection unit (8) connects the elements for evolving the compact between transport and usage configurations. The surface (6A) is placed with respect to the surface (7A) in the transport configuration. The element (7) has a storage compartment (11) for storing an application unit (3) e.g. flat brush. The connection unit is arranged such that the surface (6B) is placed with respect to the surface (7A) in the usage configuration. An independent claim is also included for a method for cosmetic treatment.
