Abstract (en)
[origin: EP2050358A2] The guide (1) has a guide rail (2) fixed at a furniture body, and a movable pull rail. A central rail (3) is provided between the pull rail and the guide rail. The rails are supported over a roller body and are movable relative to each other. Internal and external roller body tracks (6, 8) are formed at the rails, and a pulling movement of the rails is limited by elastic end stops. Each end stop is fitted at a slot of the rails and is held at the rails by a locking unit. The end stop partially surrounds the rails, and a fastening surface is supported at the rails.
