Abstract (en)
[origin: EP2050505A2] The centrifuge has a spinning drum, in which a separator disc package (2) of stacked separator discs (7) is arranged. A spacer is arranged between the axial adjacent separator discs. One or multiple of the separator discs exhibits one or several crimps (9) that are circulating in a circumferential direction in sections or completely. The spacer is designed such that spacer held the separator discs in the area of the crimps outside the spacer axial to each other in a distanced manner, where the discs consist of steel sheet.
