Abstract (en)

[origin: EP2050514A2] The arrangement has a painting device (5) for applying a smooth, non-structured covering coat of paint to the board (8), an application roller (1) for applying a paint structure (10) to the covering coat, a dosing device (4) for dosing paint onto the roller and a transport device (12) for transporting the board from the painting device to the application roller. The application roller has a rubberized surface (3) with recesses corresponding to the paint structure to be applied for transferring paint from the dosing device to the cover coat.
