Abstract (en)

[origin: EP2050675A1] The method involves deploying flat preforms formed by folding a rectangular paper sheet (40) i.e. parchment paper, for obtaining parallelepiped boxes, where each box is opened on top, and comprises a flat bottom. The boxes are positioned on a conveyor. A clamp system descends on the boxes after the boxes are placed on the conveyor. The boxes are filled by a culinary preparation i.e. food, and are closed by a separate cover. Independent claims are also included for the following: (1) a folded pouch comprising a box (2) a package comprising a cover.
