Abstract (en)

[origin: EP2050868A2] The regulating device includes an operating regulator (1) for material flow from an outlet (3). The intended value is transmitted by a pre-control device (2). It also has an additional measuring regulator (8) to determine the actual value of the surface weight. The output weight value can be corrected by correction values (24, 25) from the pre-control device.
