Abstract (en)

[origin: EP2050901A1] The device has a lock rotor (1) engaged in a lock stator that is fixed to an opening frame of a motor vehicle. A rod (3) is articulated with a lever forming cam that is removably fixed to the rotor. The cam carries a fastener forming piece (4) that is removably and pivotably fixed to the cam between release and locking positions along an axis (5) parallel to the rotor. The fastener forming piece is engaged with respect to the rotor for maintaining the cam in position on the rotor when the piece is in the locking position. The piece is molded using plastic material.
