Abstract (en)
[origin: WO2008017539A1] The invention relates to a tool receptacle (1), in particular for a hammer drill and/or rotary hammer, comprising a receptacle body (2) which has an insertion opening (3) for accommodating a tool shank (4), an axially displaceable locking control element (41) for axially locking the tool shank (4) in the insertion opening (3), and a rotatably mounted locking control body (41) for rotationally locking the receptacle body (2). Provision is made for the locking control element and the locking control body to be designed as a common component (41).
