Abstract (en)  
[origin: WO2008017665A1] A fuel tank (1) for an automobile has a ventilation device (4) with a receptacle (5) for both fueling ventilation (16) and operating ventilation (17). Ventilation lines (6, 7) attached to the receptacle (5) for the fueling ventilation (16) and the operating ventilation (17) empty into separate chambers (14, 15). In addition, there are valves (18, 19) in the receptacle (5) to close a line (8) which leads to an activated charcoal filter (9).
