Abstract (en)
[origin: WO2008017565A1] In order to control the drying of wet laundry in a household appliance 1, in which warm air is produced and in which the drying operation is ended under consideration of at least one wetness value or a measured value of the laundry to be dried which corresponds to the former, a temperature variable (21) which is determined during drying of the laundry, when or after a predefined wetness value (20) or a measured value which corresponds to the latter is reached, is additionally used for the targeted ending of the drying.
