Abstract (en)
[origin: WO2008019408A1] In a climbing formwork for concreting a wall of a structure, comprising a plurality of adjacent climbing units (3) which are each provided with at least one climbing drive (7) for pulling up the climbing unit (3) along a climbing rail (6) secured to a ready-concreted section of the wall and which each have at least one shuttering board (5) to form a shuttering shell of the climbing formwork, the climbing units (3) each comprise a formwork tower (36) with a carriage (37) which can be moved vertically along the formwork tower (36) by means of at least one carriage drive (38), said carriage carrying the at least one shuttering board (5).
