Abstract (en)

[origin: DE202006012565U1] Bolt lock (1) comprises a locking bolt (2) having two parts (8, 9) which slide relative to each other to form an intermediate space. Preferred Features: Both parts of the locking bolt have a separation which is perpendicular to the axial direction. The outer locking bolt part (9) has a handle. A plate (17) is arranged between the two locking bolt parts. The plate is separated by the locking bolt parts in a direction perpendicular to the axial direction.
