Abstract (en)

[origin: WO2008019415A1] In an apparatus for injecting fuel into the combustion chamber of an internal combustion engine having an injector (1) which is fixed in a cylinder head (2) and a plurality of feed lines and discharge lines which extend through the cylinder head (2) for supplying the injector (1) with media, in particular fuel, cooling fluid and/or lubricant, the feed lines and discharge lines are guided through a common hole (8) of the cylinder head (2), and at least two feed lines and discharge lines are formed by concentric pipes (10, 11).
