Abstract (en)
[origin: WO2008055873A2] The invention relates to a method for producing and inserting an electrode frame (1') comprising a lamp coil (6) into a discharge vessel (7) of a discharge lamp. In said method, the following steps are carried out: a) two separate electrode holders (2', 3') are provided in the form of substantially elongate wires; b) an elongate brace (8) is fastened to the two spaced-apart electrode holders (2', 3'); c) the lamp coil (6) is mounted on forward end regions (21, 31) of the electrode holders (2', 3'); d) some sections of the electrode frame (1') produced in steps a) to c) are inserted into the discharge vessel (7).
