Abstract (en)
[origin: WO2008020147A2] The invention relates to a support (1) for holding a cable harness capable of being attached to a structure to hold said harness in position and orientation with respect to said structure. Said support comprises means (2) of positioning and holding the harness close to means (3) of connecting the support to the structure and rails (4a, 4b) that extend on either side of the means (2), substantially in the direction in which the harness must be held. Each rail is attached to said first means at one end and free at the other end.
