Abstract (en)

The present invention concerns a portable device for holding a bag or the like, said device comprising a support member (1) and a hook member (4) extending downward from the support member (1) wherein the underside (6) of the support member (1) provides an area surface contact with the upper surface of an edge region of a table or the like and has a cavity (9) extending thereon. The hook member (4) is pivotable to a retracted position in the cavity (9).
