Abstract (en)

[origin: EP2052707A1] The arrangement has an upper part (O), a middle part (M) and a lower part (U). The middle part is adjustable between an upper position and a lower position relative to the lower part. A removable holding unit is provided for holding the middle part in the upper position. A dissolver is provided for loosening the holding unit and is attached at the upper part. The dissolver is suitable and adjusted in the lower position of the upper part to detach the holding unit and to release the middle part from sliding position into the lower position.
