Abstract (en)
[origin: EP2052765A2] The assembly (1) has a receiving device (2) for temporarily receiving a foot or a boot, where the receiving device is mounted on a board (3) i.e. snowboard. A marking system (170) marks a position of the receiving device with respect to the board using ink. The marking system includes a marking arrangement (171) that is associated with the receiving device and another marking arrangement (172) that is associated with the board. The marking arrangements cooperate with each another. The arrangement (171) is positioned relative to the arrangement (172), or vice versa.
