Abstract (en)
[origin: EP2052858A2] The printing machine arrangement has multiple reel changers (10), multiple printing units (11,12) and a folder unit (13). All the reel changers and all the printing units are arranged in matrix and array level under minimization of distance between the reel changers positioned into each other and under minimization of distance between the printing units positioned into each other, and serve the printing of different printing-material webs (14). The printing units have a printing group (15).
