Abstract (en)
[origin: EP2053623A2] The switching device (1) has a housing (3), at which an actuating head (4) is attached in pivoting manner, and is accessible from outside. One or multiple transmission elements are pivoted in housing. The three transmission elements are offset from one another laterally in the housing. The actuating head is held selectively around one or multiple axes that are tilted or linearly adjusted in one of the two axes directions of the housing.
