Abstract (en)

[origin: WO2008022700A1] The invention relates to a cleaning device for cleaning a workpiece (104), comprising a suction device (100) for removing dirt from the interior of the workpiece by suction. The aim of the invention is to considerably improve the suction force of said suction device. For this purpose, the suction device comprises at least one vacuum container (106), at least one evacuation device (128) for evacuating the vacuum container, at least one ventilation line (108) for connecting the vacuum container to the workpiece and at least one blocking device (110) for blocking the connection between the vacuum container and the workpiece.
