Abstract (en)

[origin: WO2008023123A1] A method of manufacturing a laminated sheet that includes an element of natural stone and in particular manufacturing a lamination formed from at least one glass pane and one natural stone sheet, in which the natural stone element is connected to another material by an adhesive bond over its entire surface; according to the invention, the porous natural stone element is completely impregnated under pressure by a liquid that forces the gas inclusions out of the stone material and durably seals the outer surface of the natural stone element.
