Abstract (en)

[origin: WO2008019829A1] The invention relates to a method and a device for circumferentially printing containers (1), especially for printing bottles (1) all around. The respective container (1) and/or a print head (4) is/are rotated and is/are provided with a printed image according to artwork (3). According to the invention, the artwork (3) is supplemented with associated angle markings (9) regarding the extension of the artwork (3) in the circumferential direction (U) and/or the direction of the vertical axis (H) in order to trigger the rotational movement during the printing process.
