Abstract (en)
[origin: DE102006060829A1] Bearing arrangement comprises a bearing bushing (20) arranged axially and/or radially between bearing elements (7, 10) and having a plate section (20a) acting as a plate spring for axial play equalization and a barrel section (20b) acting as a barrel spring for radial play equalization. An independent claim is also included for a vehicle seat with the above bearing arrangement. Preferred Features: The first bearing element (7) is pressed into or welded to a first component (9) and the second bearing element (10) is screwed into a second component (12). The bearing bushing is pushed onto the second bearing element during assembly of the bearing arrangement.
