Abstract (en)
[origin: WO2008022892A1] An arrangement with a disc insulator (1, 1a) has a central zone (3), which is surrounded by a transition zone (4), which has a wall thickness which is reduced in comparison with the central zone (3). The disc insulator (1, 1a) furthermore has an edge region (5), which is connected to the central zone (3) via the transition zone (4). A first, a second and a third conductor piece (11a, 11b, 11c) are arranged in the central zone (3).
