Abstract (en)

[origin: EP2055359A1] The arrangement has a fixation element (11) comprising a docking bolt and a closing bolt, and a clamping lever (12) comprising a connection rod (30) for connecting a boot, with an imprisonment unit. The clamping lever comprises a rear end portion (10) of a connection bar (6) cooperating with the docking bolt in order to obtain a secure intermediate docking fixation configuration. The clamping lever comprises a docking rod cooperating with the closing bolt in order to obtain a closing configuration.
