Abstract (en)

[origin: EP2055428A2] The device (1) has a circular base (3) on which external bristles (4) and internal bristles (5) are arranged and distributed to an extent, where the device rotates around a symmetric axis of the circular base. The external bristles and the internal bristles machine the respective workpieces (2a, 2b) simultaneously. The external bristles are directed outwardly and radially on outer circumference, and the internal bristles are directed inwardly and radially on inner circumference.
