Abstract (en)
[origin: EP2055444A1] The marking gage (T) has a movable body (CM) sliding on a rule (11). The body has a receiving case (13) and a cover (14) which are assembled and internally arranged with authorizing units for authorizing the reception of a cutter blade holder sliding block in a reversible position, and authorizing the alternative displacement of the sliding block in cutting or non usage condition. The units authorize the arrangement of blades of a cutter in a storage condition, the positioning of a tracing tool (17), and the locking of the sliding block in a position in a pencil utilization condition.
