Abstract (en)  
[origin: EP2055454A1] A processing device (1) comprises a clamping device (10) for clamping a workpiece (2), a preferably beam-shaped guide device (20) with a section extending over the clamping device, traversable in a first direction with the guide device, relative to another, and at least one first processing unit, especially a spindle unit arranged on the guide device (20) in a second direction. The processing unit in addition has a second processing unit (50) oriented so as to process workpieces positioned in the feeder device (40).
