Abstract (en)
[origin: EP2055544A2] A work machine (10) includes an internal combustion (IC) engine (12) having an output, and an infinitely variable transmission (IVT) (14) coupled with the IC engine output. The IVT (14) includes a hydraulic module (18) and a mechanical drivetrain module (20). A pressure transducer (38) is associated with and provides an output signal representing a hydraulic pressure within the hydraulic module (18). At least one electrical processing circuit (28) is configured for controlling the IC engine output, dependent upon the output signal from the pressure transducer (38).
