Abstract (en)

[origin: EP2055884A1] The profile (1) has an attachment profile (10) arranged on an outer side of profile halves (2, 3) i.e. outer and outer shells. The profile (10) extends in a longitudinal direction of the profile halves. The profile (10) is connected with the profile halves via two fixing points distanced from each other in a longitudinal direction of the profile (10) in a tolerance free manner. The profile (10) has a profile body, which exhibits a supporting side that stands in contact with an outer side of the profile halves, where supporting side length is smaller than/equal to depth of the body.
