Abstract (en)

[origin: EP2055887A2] The method involves fastening a door seal to a door wing with intended use in a use position. A sealing element of the seal is downwardly arranged in the use position. The seal is arranged in or at the wing in a transporting position that is different from the use position during storing or transporting. The seal is arranged in the transporting position along orientation to the use position. The seal is laterally pushed in a groove of the wing in the transporting position. An independent claim is included for door system.
