Abstract (en)

[origin: EP2055888A2] The door has a door seal arranged in a downward opening door groove, where the door seal exhibits a seal housing (1) with a bar (11) and two laterally arranged brackets (10). The seal housing is arranged and fixed in a position in the door groove. A dropping protection element is partially formed in the door groove. A stopper element e.g. stopping angle (5), is arranged at the seal housing or is formed at an end of the door groove closed in upper areas such that the door groove is designed to be smaller than width of the door in the upper areas.
