Abstract (en)

The invention concerns a charge fluid intake module (1) for an internal combustion engine (11) having a housing (2) which forms a flow path for a gaseous charge fluid (13, 17), in particular air, a gas and/or an air/gas mixture. According to the concept of the invention, it is provided that the housing (2) is designed to receive a heat exchanger (31) for an exhaust gas (45) and substantially in one piece with two housing portions, a connection piece (7) for the charge fluid on the first housing portion (3) being designed for connection to an inlet manifold (83) of a charge fluid intake tract (10).
