Abstract (en)
[origin: EP2056053A2] The arrangement (1) has an air dryer provided with an air passage system (24) with supply and exhaust air (11, 16, 9, 17), and a radiation dryer provided with an air passage system (25). The air passage systems of the dryers exhibit connections (10, 18) of the supply and exhaust air, where the air passage systems are connected with each other in the area of the exhaust air. Different temperatures and/or loads are adjustable in the air passage systems, and conveyer systems are arranged in each connection.
