Abstract (en)  
[origin: WO2008022364A2] The invention describes a rotatable shade-providing oasis, with a reclining surface (1) which is mounted rotatably on a standing base (3) by means of an axle (2), wherein the rotational movement via a rotary disc (5) connected fixedly to the standing base (3) can be carried out manually by a user or via a motorized device. In this case, a pivotably mounted tube (6) for receiving a shade dispenser (7) is provided in a bearing bracket (8), which tube, when the reclining surface (1) is rotated, can be brought via a frictional connection or by means of a motorized drive or manually into an oblique position corresponding to the altitude of the sun.
