Abstract (en)

[origin: WO2008022764A1] Cleaning apparatus for sprayers (8), in particular spray guns, comprising at least one sprayer holder (3) for holding a sprayer (8), preferably a spray gun head, a mixing device (9) with a compressed air input (10), a cleaning agent input (11) and a mixture output (12), wherein the mixing device (9) is set up in order to mix the compressed air and the cleaning agent and to supply the mixture in the form of a compressed air and cleaning agent mixture to the mixture output (12), wherein a spraying device which is connected to the mixture output (12) is aligned with the sprayer holder (3) and is suitable for dispensing the cleaning mixture by spraying, wherein the mixing device (9) is set up to supply the compressed air to the mixture output (12) with a pressure differential in relation to the cleaning agent, and wherein the mixing device (9) is furthermore set up to supply the compressed air to the mixture output (12) at a higher pressure than the cleaning agent, and also a method for cleaning a sprayer with a cleaning apparatus, characterized in that compressed air is supplied to the mixture output (12) with a pressure differential in relation to the cleaning means, with the compressed air being supplied to the mixture output (12) at a higher pressure than the cleaning agent.
