Abstract (en)
[origin: WO2008025884A1] The invention relates to a tool for bending a pipe (6), which tool includes an operating device (16), a guide (14) and a moving slide (15) therein, two opposing dies (12, 13), installed on a different plane relative to the slide, one (13) of which is installed on the said slide (15) to be moved on the guide (14). The guide (14) is a tubular piece, in which there is a longitudinal gap (20) and the slide (15) is a piston piece fitted inside it, which is connected to the external moving die (13) with the aid of a pin (13.1) placed through the gap (20).
