Abstract (en)
  [origin: WO2008025596A1] A furniture hinge (1) comprises an installation plate (2) on which a side part (3) is arranged, and a hinge part (4) mounted pivotably on the side part (3) via a supporting lever (5) and a guide lever (6), wherein at least one damping element (11, 12, 14) which is movable by the supporting lever (5) is provided to damp a closing movement of the hinge part (4). In this case, the at least one damping element (11, 12, 14) is arranged adjacent to the supporting lever (5), in the region in which the axis of rotation (8) of the supporting lever (5) extends on the side part (3), thus resulting in a compact construction, since the hinge part (4) is not extended on the side lying opposite the side part (3) by the addition of a damping element.
