Abstract (en)
[origin: WO2008026843A1] Provided are an ice maker and a refrigerator including the same. An ice maker is mounted on a rear side of a door. Flooding of water stored in an ice tray is prevented by a tray cover. Also, an ice bank storing ice made from the ice maker is taken in and out through a home bar provided to the door. Therefore, reduction in the storage capacity of the refrigerator is minimized, and simultaneously, the ice can be easily taken out.
