Abstract (en)  
[origin: US2008059909A1] A mobile communication apparatus including a display and means for navigating among items displayed on the display, arranged to display a first list of items belonging to a higher hierarchical level on the display and being capable of enabling selection of a first item among the higher hierarchical level items by the means for navigation is disclosed. Upon selection of the first item, being arranged to insert and display a second list including at least one item belonging to a lower hierarchical level between the first item and subsequent higher hierarchical level items for enabling selection of a second item from the second list, wherein the second list is hierarchically associated with the first item. A corresponding application, apparatus and computer program are also disclosed.
