Abstract (en)
[origin: EP2057976A2] The carrier section rail (1) has a base (11) arranged in an upper assembly position and two journals (12,13) that are connected by the base. The base has an attachment recess (14) for mounting cover assembly element at the turned away side of the journals. The journals have pair of angles (15,16) adjusted inwardly at one another and another pair of angles (17,18) adjusted outwardly. Independent claims are included for the following: (1) a method for manufacturing a carrier section rail; and (2) a load carrier arrangement of a carrier section rail and load carrier.
