Abstract (en)
[origin: EP2058095A2] The machine (10) has a material transport system consisting of a conveyor belt discharge (18) or a blower discharge (16). A wood chip collecting system consists of a screw conveyor, and directly conveys the wood chip to a blower of the blower discharge during closing of a convey trough, and conveys the wood chip on a conveyor belt (20) of the conveyor belt discharge during opening of the convey trough. The conveyor belt is pivotable to left and right in a working position, and is foldable for transport. The conveyor belt is detachable from the machine.
