Abstract (en)

[origin: EP2058116A2] The textile sheet material has multiple parallel running elevations (220) and recesses (240) that extend from a side to the other side of a plane (E). The sides rotate the plane corresponding to unembossed surface area. A ridge (225) of an elevation and a valley bottom (245) of a recess have a wedge shaped process (250). Independent claims are included for the following: (1) a cylindrical embossing roll for embossing non-woven, particularly for household cloths; (2) an embossing machine for embossing non-woven, particularly for household cloths; and (3) a method for manufacturing textile sheet material for non-woven, particularly for household cloths.
